

For this condition, The canopy length is more than 2.1m, The canopy projected area needs to be calculated by half into the GFA.

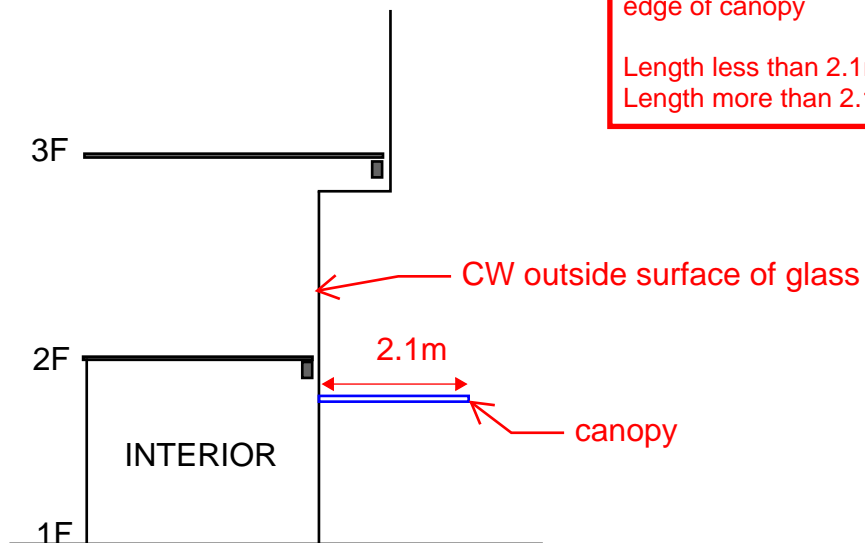

For this condition, The canopy length is more than 2.1m, The canopy projected area needs to be calculated by half into the GFA.

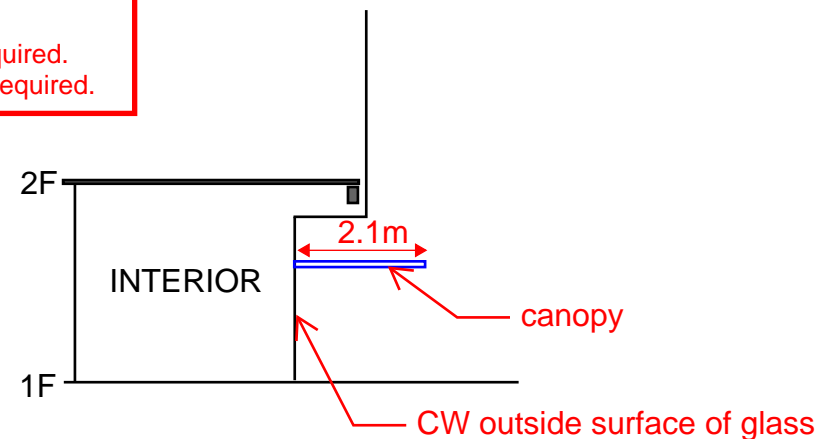

Canopy Area Principle

Canopy length means exterior glass surface to the outside edge of canopy

Length less than 2.1m, no GFA calculation is required.
Length more than 2.1m, half GFA calculation is required.

For this condition, The canopy length is less than 2.1m, no GFA calculation is required.

For this condition, The canopy length is less than 2.1m, no GFA calculation is required.
